RAHUL KUMAR

Senior AWS & DevOps Engineer | Site Reliability Engineer (SRE) | Cloud Platform

Delhi, India +91-7210476048 rktech7621@gmail.com LinkedIn GitHub

PROFESSIONAL SUMMARY

Results-driven **Senior DevOps & Cloud Infrastructure Engineer** with **4+ years of hands-on experience** architecting, automating, and scaling production-grade enterprise platforms on **Amazon Web Services (AWS)**. Deep expertise in container orchestration with **Kubernetes (Amazon EKS)**, Infrastructure as Code (**Terraform**, **CloudFormation**), automated CI/CD deployment pipelines (**Jenkins**, **GitHub Actions**, **ArgoCD**), and distributed microservices observability (**Prometheus**, **Grafana**, **CloudWatch**). Proven track record of slashing release cycles from hours to under 30 minutes, maintaining 99.95%+ service availability SLAs, and implementing least-privilege cloud security (IAM, IRSA, WAF).

OFFICIAL AWS CERTIFICATIONS & CREDENTIALS

AWS Certified DevOps Engineer – Professional (DOP-C02)
Amazon Web Services | Issued Oct 2026

AWS Certified Data Engineer – Associate (DEA-C01)
Amazon Web Services | Issued Oct 2026

AWS Knowledge: AI Driven Development Lifecycle Foundations
AWS Skill Builder / Credly | Official Score: 97%

AWS Knowledge: Cloud Essentials
AWS Skill Builder / Credly | Official Score: 96%

AWS Cloud Quest: Cloud Practitioner
Amazon Web Services | Issued Oct 2026

TECHNICAL CORE COMPETENCIES

Cloud Platforms (AWS):	Amazon EKS, EC2, S3, RDS (PostgreSQL/Aurora), VPC, IAM, Route 53, CloudFront, ALB/NLB, Lambda, CloudWatch, AWS WAF, KMS, Secrets Manager, CodeArtifact.
Containers & Orchestration:	Docker, Kubernetes, Helm Charts, Istio Service Mesh, HPA, StatefulSets, ConfigMaps, Secrets, Ingress Controllers.
Infrastructure as Code:	Terraform (Modules, Remote State, Workspaces), AWS CloudFormation, Ansible (Playbooks, Automation).
CI/CD & Release Automation:	Jenkins (Declarative Pipelines, Shared Libraries), GitHub Actions, ArgoCD (GitOps), Maven, SonarQube, Trivy.
Observability & SRE:	Prometheus, Grafana, CloudWatch Logs/Alarms, Nagios, SLA/SLO definition, MTTR reduction, Incident Triage.
Data & Middleware:	Apache Kafka (Topics, Consumer Groups), Redis Cache, Apache Airflow, Lake Formation, Glue fundamentals.
Operating Systems & Code:	Linux (Ubuntu, Amazon Linux, RHEL), Shell/Bash Scripting, Python, Git / GitHub / Bitbucket.

PROFESSIONAL EXPERIENCE

DevOps & Cloud Platform Engineer | Programming.com (Client: Allcargo Logistics)

March 2025 – Present

Platforms: iTopaz Cloud Logistics, iTariff Global Platform, Prefiler Customs Gateway

- **Kubernetes & EKS Infrastructure:** Architected and maintained multi-tenant **Amazon EKS** production clusters hosting high-throughput microservices; configured Horizontal Pod Autoscaling (HPA), Cluster Autoscaler, and node group optimizations reducing compute waste by 22%.
- **Infrastructure as Code:** Developed modular, reusable **Terraform** configurations to provision VPC networking, multi-AZ subnets, security groups, RDS PostgreSQL/Aurora clusters, and EFS storage across Dev, SIT, UAT, and Production environments.
- **GitOps & CI/CD Pipelines:** Implemented automated end-to-end delivery pipelines leveraging **Jenkins**, **GitHub Actions**, and **ArgoCD**; automated container vulnerability scanning with Trivy, image tagging, Amazon ECR publishing, and zero-downtime rolling deployments.

- **Service Mesh & Traffic Routing:** Deployed **Istio Service Mesh**; configured Istio Ingress Gateway, VirtualServices, and mutual TLS (mTLS) for secure intra-service communication and traffic splitting.
- **Cloud Security Hardening:** Implemented least-privilege IAM policies, AWS Organizations boundary controls, and **IAM Roles for Service Accounts (IRSA)**; enforced automated SSL/TLS via AWS Certificate Manager (ACM) and configured **AWS WAF** rules mitigating OWASP Top 10 web vulnerabilities.
- **Observability & SRE Operations:** Built centralized monitoring dashboards using **Prometheus**, **Grafana**, and **AWS CloudWatch Alarms**; configured proactive Slack/SNS alerting reducing Mean Time to Resolution (MTTR) by 35%.

DevOps Engineer | Midea India

October 2020 – December 2022

Platform: Enterprise Logistics & Commercial Operations Platform

- **CI/CD Automation:** Set up and administered central **Jenkins** masters and distributed build agents; authored Jenkins Declarative Pipelines integrating Git Webhooks for automated builds on push/merge events.
- **Configuration Management:** Authored **Ansible** playbooks to automate package installation, configuration management, and baseline security provisioning across 40+ Linux and Ubuntu EC2 instances.
- **AWS Cloud Operations:** Managed core AWS services including EC2, S3 bucket lifecycle policies, Application Load Balancers (ALB), and Route 53 public/private hosted zones.
- **Container Setup:** Containerized legacy Java and Python monolithic applications using **Docker**; created multi-stage Dockerfiles reducing production container image sizes by ~45%.
- **Disaster Recovery & Backup:** Automated EBS snapshot creation, RDS automated cross-region backup retention, and disaster recovery validation procedures ensuring compliance with business RPO/RTO objectives.

EDUCATION

Master of Business Administration (MBA) – Business Analytics **2023 – 2025**
Delhi Technological University (DTU), Delhi

Bachelor of Technology (B.Tech) – Information Technology **2016 – 2020**
Delhi Technological University (DTU), Delhi

RESEARCH & PUBLICATIONS

Biometric System: Unimodal Versus Multibiometric Fusion and Its Current Applications **Jan 2021**
Published in Springer (Lecture Notes in Networks and Systems - LNNS / LNDECT) | Authors: Mahesh, Rahul Kumar, Kapil Sharma
